

4/29/69

Louis Iven from Harold Weisberg
Frederick S. O'Sullivan testimony

Here is page 13 of the typescript of the testimony. It is in the printed version on 8H31. The third paragraph, the second answer, has been edited to eliminate all but the first two lines.

This means that all reference to Ferrie as a homosexual has been eliminated.

Now it can be argued this was done to protect Ferrie. It was not done in other cases in New Orleans. It was done by Liebelar. He also is responsible for those cases where it was not done, as in the documents relating to Bringuier, where a number of men were identified by Bringuier as homosexuals. Such stuff is readily available. - have a case in OSWALD IN NEW ORLEANS, where I eliminated the identifications.

Nowing as I do that Liebelar knew of Ferrie's friendship with Arcache, that he hung around at 544, that the CIA had financed the Cuban Revolutionary Council - and Liebelar did know all these things, for - have his acknowledgement on tape- I think it need not be concluded that he had only the highest of motive in the editing of testimony. This is fortified by those other New Orleans testimony changes he made and of which - have knowledge, where he undertook to shelter perjury.

I suggest that you again think of the spiriting of Philip out of Orleans Parish the night of Ferrie's death.

Gary and Paul: I asked Barry to get this for me. The original copy has O'Sullivan's name written on the bottom (it is on a legal-sized sheet) and the page of the printed testimony with which it coincides. Interestingly enough, with this identification, it is not the copy that went to the GPO, for the elimination of the referred-to parts is not indicated. I had told Barry what page I wanted and the knowledge came from word by word comparison. On the GPO copy, the change would appear in Liebelar's handwriting. I have asked Barry to consult only the GPO copies.

Original under Testimony, Edouard
